Abstract

Indonesian Downhill(IDH) *is a mountain bike racing championship, which stood since 2012 in Yogyakarta, Indonesia. IDH in 2015, will hold five championship series Downhill interspersed with four series Urban Downmall. Since its establishment until now, IDH less attention outside the community to participate in the championship because of the lack of online registration. Then be made to the system to accommodate such registration along with the judgment referred to the Race Management System. This system is built with the method prototype model where data collection is by interview and observation. The development of this system is designed to use Yii Framework 2.0, which is a framework that is growing rapidly at the moment. Results of this system design is expected to be one way to increase the IDH to be more widespread.*

Keyword: Indonesian Downhill, Race Management System, Yii Framework.
